Re: Fort Bend County Municipal Utility District No. 155 (the "District")
Bonbrook Plantation B Erosion

Dear Ms. Habetz:

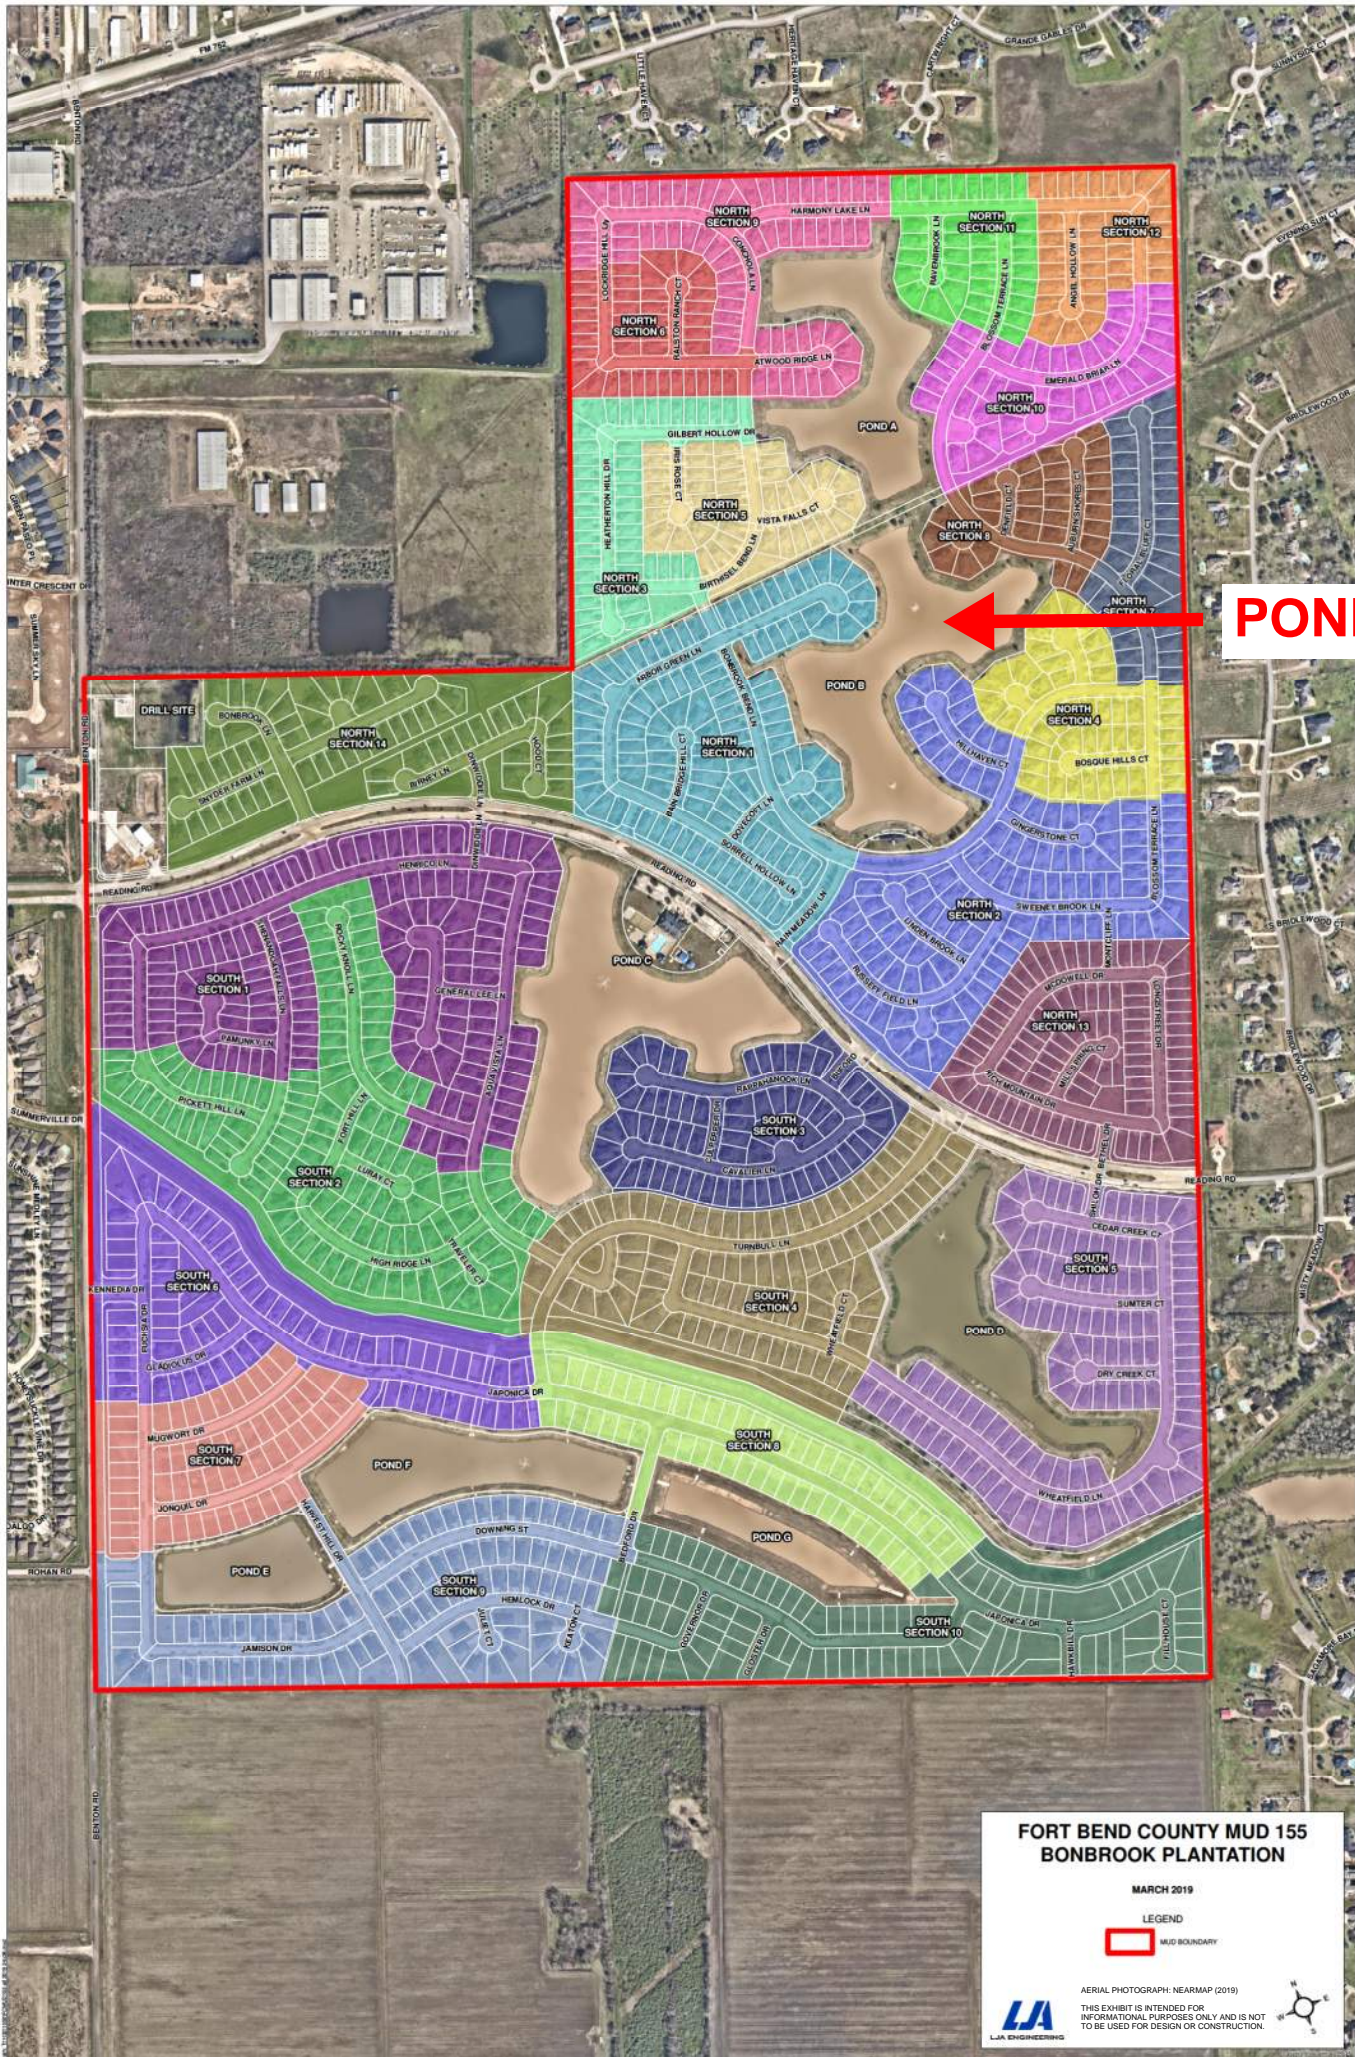

The District will be undertaking a project to address shoreline erosion in Pond B. Before construction begins, the lake will need to be lowered and will remain at that level until construction is complete. Construction is expected to begin in April and commence at the end of May. Pond B is located on the north side of Reading Road, near the meditation center. A map showing the location of Pond B is on the following page. Please note, this timeline is subject to change.

While the current project will only address erosion in Pond B, the Board of Directors of the District is considering various options to address erosion in all of the District's lakes. Please contact me should you have any questions or concerns.

Sincerely,

Nellie Connally
Attorney for the District
